**Subject:** feedback for FAQs

Hi Lt. Crass,

I'm hoping to hear from your perspective what would be most helpful in terms of the specific questions we address in FAQs that we build regarding Camp 210 and the services available in town.

Specifically, if there are pieces of misinformation or false narratives that you know are being spread, we'd love to hear that. We hope to name some specific safety concerns, so please let me know of any reports that you recommend we review or safety issues that you think we should address. For instance, Tara and I spoke to Hans after our call this morning and asked for specific examples to include about occurrences at Base Camp, which we hope can provide a more tangible understanding of how things operate there.

Our goal is to build clear content that provides public information about the services available and some of the significant challenges associated with the encampment.

Many thanks for your feedback,  
Liz
